

A photograph of a white Orkanda Home Lift installed on a wooden staircase. The lift is a chair-like device with a beige upholstered seat and backrest, white armrests, and a white base. It is positioned on the wooden steps of a staircase with a wooden handrail. The background shows a white wall with a framed picture and a window with blinds.

Regain your **independence** and conquer the **struggles** of staircase

Orkanda offers a chairlift solution that gives you freedom of movement throughout your home, allowing you to age on the spot without the hassles of everyday life. The compact and adjustable hanging chair can be installed anywhere. We have dozens of satisfied customers with our large selection of chairlifts.

Regain your **independence** and conquer the **struggles** of staircase

Handicare Freecurve features a revolutionary design that takes up less space on stairs with special features that provide unlimited options. The spiral, narrow and steep staircase presents no challenge to the Freecurve thanks to its single tube rail, which is designed to fit into any home with a circular staircase.

Easy to maintain with a quiet and smooth ride that provides ultimate safety and comfort. The Freecurve is available in unique and elegant designs in a wide selection of chair and rail colors to match your home décor and personal taste.

Compact

The Orka Free Curve folds easily to maximize space for family members to climb up and down stairs as needed when not in use.

Easy to Use

Ergonomic and intuitive to use, the joystick on the palm rest operates the Freecurve smoothly.

Adaptable

Combine your chairlift with a powered hinge or drop nose option to prevent tracks from blocking the door at the base of the stairs.

Multiple Charge Points

Charging points are conveniently located at the top and bottom of the ladder for painless recharging.

Turn & Go

Narrow stairs are not a problem for freecurves, the optional Turn & Go feature automatically rotates your seat forward while driving. A convenient solution that allows more space for users in tight environments.

Active Seat

The optional active seat option makes sitting or getting up from your Freecurve even easier. With just a pull of the lever, your movement is supported to maintain tension in your joints and muscles. (Available with Alliance and Elegance seats).

Safety First

An optional powered footrest lets you fold and unfold the footrest without bending over, LED lighting improves visibility in low-light areas (standard with powered footrests) and a non-slip texture provides better grip on the foot when sitting up and going.

Automatic Swivel

Optional powered swivel makes it easy to get off the lift at the top of the landing, simply hold down the toggle switch in the landing direction to rotate the seat for a controlled departure. With an 80 degree tilt, you face more top landings which provide greater safety when getting up from your Orka Freecurve. (Manual turning standard).

Classic Seat

The Classic Chair is very comfortable and designed with the input of the therapist. Corner seats with faux leather upholstery that offer a timeless ergonomic design.
